In the March issue of "Informacion Democratica" there appeared a small paragraph titled "CIA in Spain" with the following information:

On 6 March on a flight from New York, General Walters, the sub-Director of CIA who is in charge of the administrative division of that organization, arrived in Madrid. The motive of his journey was to reorganize CIA's activities in Spain in accordance with the new line set forth by its directors in the United States last year. Also, there was speculation about the relationship this journey and the revision of the Spanish/U. S. Base Agreement. In this respect the newspaper Pueblo on the 27th of February said that a change in the use of Spanish territory by the Pentagon would propose "a guarantee of Spanish security against all possible internal enemies".

The above information may be of interest to General Walters.
